Wease House

Architectural Survey File

This is the architectural survey file for this MIHP record. The survey file is organized reverse-chronological (that is, with the latest material on top). It contains all MIHP inventory forms, National Register nomination forms, determinations of eligibility (DOE) forms, and accompanying documentation such as photographs and maps.

Users should be aware that additional undigitized material about this property may be found in on-site architectural reports, copies of HABS/HAER or other documentation, drawings, and the “vertical files” at the MHT Library in Crownsville. The vertical files may include newspaper clippings, field notes, draft versions of forms and architectural reports, photographs, maps, and drawings. Researchers who need a thorough understanding of this property should plan to visit the MHT Library as part of their research project; look at the MHT web site (mht.maryland.gov) for details about how to make an appointment.

All material is property of the Maryland Historical Trust.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This two-story framed and weatherboarded house faces southwest onto the Patuxent River and Patuxent Avenue. Set on a low brick foundation, it is a cross-gable house with the three-bay facade in the gable end of one wing. It has a side-passage plan. The original windows are glazed with two-over-two double-hung sash. Some of the windows have been changed to single-pane double-hung sash. There are interior brick chimneys. The one-story hipped-roof porch is supported on Doric columns. It shelters both the facade and the southeast side of the house. Part of it is screened in. The fenestration of the facade has been changed to include a side doorway and one broad picture window. This house looks very much like the Abel House (CT-899) on Solomons Island Road. There is an original cast and wrought-iron fence delineating the edge of the front yard.
