Structure 08033XO, Culvert

Architectural Survey File

This is the architectural survey file for this MIHP record. The survey file is organized reverse-chronological (that is, with the latest material on top). It contains all MIHP inventory forms, National Register nomination forms, determinations of eligibility (DOE) forms, and accompanying documentation such as photographs and maps.

Users should be aware that additional undigitized material about this property may be found in on-site architectural reports, copies of HABS/HAER or other documentation, drawings, and the "vertical files" at the MHT Library in Crownsville. The vertical files may include newspaper clippings, field notes, draft versions of forms and architectural reports, photographs, maps, and drawings. Researchers who need a thorough understanding of this property should plan to visit the MHT Library as part of their research project; look at the MHT web site (mht.maryland.gov) for details about how to make an appointment.

All material is property of the Maryland Historical Trust.

Is property located within a historic district?: X no __ yes Name of District: _____

Is district listed?: X no __ yes

Documentation on the property/district is presented in: Project Review and Compliance Files

Description of Property and Eligibility Determination *(Use continuation sheet if necessary and attach map and photo)*

The culvert on Old Washington Road (Route 925, structure #08033X0, in the vicinity of Waldorf) is constructed of a concrete abutments, channel, and parapet walls. The parapet walls are articulated by a single etched rectangular block, a concrete base, and a concrete cap.

The increase in population and development in Southern Maryland after the first quarter of the 20th century required the improvement of existing roadways and the introduction of new routes. The extension of the Crain Highway to the Potomac and the completion of the Governor Harry W. Nice Memorial Bridge spanning the Potomac River Bridge near Pope's Creek in 1940 served to link Charles County with transportation networks from Florida to New York. This, in turn, brought more development and suburbanization to the area surrounding La Plata. In response to the increased traffic, the State Roads Commission began widening the Crain Highway as part of the U.S. 301 project in the late 1950s. Dualization of the roadway consisted of constructing two additional lanes while the earlier two lanes remained to carry traffic in the opposite direction. Use of U.S. 301 for commercial traffic declined when Interstate 95 was completed in the late 1960s.

Reviewer, NR Program **Date**

Built circa 1940, this concrete culvert is not eligible for the National Register. While it is typical of roadway improvements surrounding La Plata, this resource lacks significance related to events, persons, or architecture. Criterion D, information potential, was not assessed for this study.
