Justification for decision: (Use continuation sheet if necessary and attach map)

According to information prepared by SHA, Bridge #18009, a 22' long steel beam structure constructed in 1936, has no particular design significance. Although it is located in the St. Mary's City Historic District, it does not contribute to the district's significance as the 17th century provincial capital of Maryland nor does it seem likely to contribute to any possible later periods of significance.

Documentation on the property is presented in: project files
