Summary Description:

In January and February of 1995, a Phase I survey was carried out near the Baltimore-Washington International (BWI) Airport, for a (then) proposed Hiker-Biker Trail through the area. This trail project entailed the construction of 5,491 meters (3.35 miles) of a 3.05 m (10 ft) wide bituminous concrete trail. During the course of the investigation of the trail right-of-way, several STPs identified a site 'near' known site 18AN29B. This was thought, at the time, to be a separate site and was assigned the site number 18AN965. Subsequent researchers have suggested that this is, in fact, merely the eastern portion of 18AN29B. Review of the site maps from both the 1979 research project and the one carried out in 1995, do seem to suggest that 18AN965 is in the same general area as three smaller test squares excavated in 1979 for the MD 170 dualization project. Thus, the data for 18AN965 has been recorded within the synopsis report for 18AN29B. Please see the synopsis report for 18AN29B for more information.
