Other name(s)

Historic

Unknown

Brief Description:

late 18th-early 19th century brick rowhouses

## Site Location and Environmental Data:

Maryland Archaeological Research Unit No. 7

SCS soil & sediment code Ub

Latitude 39.2827

Longitude -76.5878

Physiographic province Western Shore Coastal

Terrestrial site

Underwater site

Elevation m

Site slope 0-5%

Ethnobotany profile available

Maritime site

Site setting

-Site Setting restricted

-Lat/Long accurate to within 1 sq. mile, user may need to make slight adjustments in mapping to account for sites near state/county lines or streams

### Topography

- Floodplain
- Hilltop/bluff
- Interior flat
- Upland flat
- Ridgetop
- Terrace
- Low terrace
- High terrace
- Rockshelter/cave
- Hillslope
- Unknown
- Other
- Made land

### Ownership

- Private
- Federal
- State of MD
- Regional/county/city
- Unknown

### Nearest Surface Water

Name (if any) Northwest Branch of Patap

#### Saltwater

Ocean

Estuary/tidal river

Tidewater/marsh

#### Freshwater

Stream/river

Swamp

Lake or pond

Spring

Minimum distance to water is 76 m

## Summary Description:

Queen Street Lot 23 (18BC52) is a complex of late 18th – early 19th century brick rowhouses in the Fells Point district of downtown Baltimore. The site is situated at the intersection of Thames and S. Caroline Streets. The extension of Caroline Street in the second quarter of the 19th century cut through this lot, creating a triangular shape for the individual house lots on the corner. Most of the area surrounding the site is heavily developed. Soils mapped for the area are classified as “Urban Land” meaning that 80% of the surface is covered either by buildings or by impervious surfaces such as asphalt or concrete.

No detailed archival research is known to have ever been undertaken for 18BC52. What is known is that the site sits on Lot 23 of Queen Street (now Block Street) on a plat of the city produced in 1773. In the early 19th century, five rowhouses fronting on the north side of Thames Street stood at the site. No other information is known at present.

The site was investigated archeologically in August and September of 1984 (and potentially after that as well). The Bond Street Associates, who were the owners of the property at that time, funded a survey of the site. At the time, the extant structures were slated for development. In 1987, the Bond Street Associates declared bankruptcy. The property and buildings were never renovated or developed as proposed and no final report or documentation of the excavation was ever completed.

A very brief preliminary report was written, which describes findings at the site up until September 2nd of 1984. At that time work was ongoing.

A grid was established oriented along Thames Street and three north-south backhoe trenches were opened and excavated. Profile drawings were made of each trench and photographs were taken. An intact seawall was exposed in one trench at a depth of about 1 m. Just north of the seawall, in an early 19th century level, a silver coffee urn, a tin or pewter platter, and numerous pieces of shoes and leather were encountered in the waterlogged matrix. Other artifacts included creamware and pearlware sherds, wine bottles, metal flatware, and clay pipes.

No other information on the site is documented at MHT. Today the site is the location of a large a mixed-use building. The impact of the construction of this building is not known, but likely destroyed any remaining elements of the site.
