Summary Description:

The Keith House Burial (18CE141) is a late 17th century human burial. The site is located on the west shore of Elk River in Cecil County. A map from 1673 shows two plantations on Elk Neck in the 17th century. The person buried may have been related to one of those households.

In September of 1978, bulldozers exposed remains of a skeleton during construction of a new house. The burial was located in the builder's trench under what would be the front porch of the house and below the front door. The bulldozer severed the remains below the torso. The state police investigated and removed some of the disturbed leg bones. Archeologists from the Maryland Geographical Survey (MGS) then excavated the burial. No report from that excavation was completed but notes, drawings, and the artifact inventory are located in the site file.

The top of the skeleton was 58 cm below the top of the pit and 81 cm below the surface. It was an extended burial with disarticulated feet and hands, although some foot bones were recovered by the police. The hands were apparently not recovered. The skeleton was determined to most likely be that of a male, possibly in his early 30s. This was thought to be a late 17th century burial based on the analysis of pipe stems found in the burial pit. Rosehead nails were found on either side of the skeleton, and oyster shell and numerous animal bones were found in the grave fill. From the artifact inventory, it would appear that no samples of the oyster shell were retained.

In total, 108 artifacts were reported from the site. There were 26 architectural items (18 rosehead nails, 7 unidentified nails, 1 metal hook). There were 83 kitchen-related items (1 bottle glass fragment, 8 unidentified earthenware sherds, 46 animal bone fragments, 1 vial of small animal bone fragments (counted as 2 artifacts), 6 animal teeth). Miscellaneous items included 3 fragments of unidentified green glass. There were 16 tobacco items (5 kaolin pipe bowl and 9 stem fragments, 1 terra cotta pipe bowl fragment, and 1 terra cotta pipe stem fragment). A single prehistoric quartz flake was also found.

The Keith House Burial (18CE141) represents the remains of what was most likely the late 17th century interment of an adult male. The skeleton, which was nearly complete, was fully excavated. The whereabouts of the skeleton is unknown. The burial's occupant may have been related to one of the two known 17th century households located at Elk Neck.
