Summary Description:

Site 18GA111 was examined in 1980 as part of Robert D. Wall's survey of prehistoric sites in the Western Maryland Coal Region. The site is situated on the Casselman River floodplain northeast of Grantsville, MD. Soils were generally very shallow and rocky with most of the artifacts confined to the A horizon or plowzone. An unspecified number of test units, shovel tests, and surface survey yielded 1 biface and 31 lithic flakes. Later work at the site in the late 1980s yielded nine additional flakes. No diagnostic artifacts were recovered and the site is described in both the 1981 and 1989 reports as a small river valley hunting camp. It is not considered significant.
