Site Name: Wall 51

Prehistoric

Other name(s)

Historic

Brief Description:

Early Archaic short-term camp, possibly associated with 18GA292

Unknown

Site Location and Environmental Data:

Maryland Archaeological Research Unit No. 24

SCS soil & sediment code UnB

Latitude 39.5907

Longitude -79.3728

Physiographic province Allegheny Plateau

Terrestrial site

Underwater site

Elevation 805 m

Site slope 0-5%

Ethnobotany profile available

Maritime site

Site setting

-Site Setting restricted

-Lat/Long accurate to within 1 sq. mile, user may need to make slight adjustments in mapping to account for sites near state/county lines or streams

Topography

- Floodplain
- Hilltop/bluff
- Interior flat
- Upland flat

Summary Description:

Site 18GA293 was first located in 1981 as part of Robert D. Wall's survey of prehistoric sites in the Western Maryland Coal Region. The site is situated on a hilltop along Bear Creek. According to the property owner, who has collected at the site for years, there are several springs in the vicinity of the site. This site is probably closely related to 18GA292 which is on an adjacent hilltop. An unspecified number of test units placed at the site in 1981 yielded only 1 flake, but the property owner's collection from the site (and the adjacent hilltop at 18GA292) includes many points diagnostic of the Early Woodland.

In 1987, Wall returned to 18GA293 to perform more extensive testing of the site. Sixteen 1 X 1 m test units were placed at ten meter intervals across the site. Results of the excavations showed evidence of only a light scatter of lithic debris across the site. The lithic raw material is almost entirely of local origin. The homogenous mixture of flakes interspersed with rare occurrences of broken tools is of low interpretable value. The artifacts recovered during this project include 1 biface, 1 biface fragment, and 98 flakes.

The site is interpreted as an Early Archaic short-term camp or lithic scatter.
