Site Number: 18GA51

Site Name: Rock Camp Run Shelter

Prehistoric

Other name(s)

Historic

Unknown

Brief Description:

Woodland rockshelter

Site Location and Environmental Data:

Maryland Archaeological Research Unit No. 24

SCS soil & sediment code CuB

Latitude 39.5441

Longitude -79.3116

Physiographic province Allegheny Plateau

Terrestrial site

Underwater site

Elevation 830 m

Site slope 0-5%

Ethnobotany profile available

Maritime site

Site setting

-Site Setting restricted

-Lat/Long accurate to within 1 sq. mile, user may need to make slight adjustments in mapping to account for sites near state/county lines or streams

Topography

- Floodplain
- Hilltop/bluff
- Interior flat
- Upland flat
- Ridgetop
- Terrace
- Low terrace
- High terrace
- Rockshelter/cave
- Hillslope
- Unknown
- Other

Ownership

- Private
- Federal
- State of MD
- Regional/county/city
- Unknown

Summary Description:

Site 18GA51 is an apparent Woodland rockshelter. It was discovered and excavated in 1955-1956 by Henry T. Wright. His work consisted of an undetermined number of test pits. There is no extant site report for the work performed at 18GA51 (Rock Camp Shelter). The only records regarding the site in the possession of the Maryland Historical Trust is a "field catalog" by Wright in which he records the quantities of artifacts he recovered and their depth. He also provides some rough sketch maps and notes, but few of the relevant details.

A number of features, including pits and possible hearths are mentioned, but Wright notes that some may be related to rodent disturbances.

A number of lithic objects were recovered, including 1 scraper, 1 "blank" (a rough biface or possible preform), 1 retouched/utilized flake, 12 pieces of debitage, and 2 "chunks". Ceramics were almost entirely shell-tempered pottery (9 sherds), including 1 rim. One Watson sherd and 2 sherds that may contain both shell and limestone tempering agents are also reported. Faunal remains were encountered as well, including several bone chips, long bones, 2 possible cut or chewed bones, and what appears to be a beaver incisor. A possible protohistoric metal pendant was also encountered. It may be an intrusive historic object, but was found just cm above shell-tempered pottery sherds.

Finally, three historic/modern objects were encountered, a piece of coal, an iron nail-head, and a firearm cartridge (lost and subsequently recovered by the excavator).

Due to the limited nature of the archeological work performed at the site and the scant reporting, it is difficult to draw any conclusions regarding the future research potential of the site or its use in the Late Woodland.
