Summary Description:

The Croom site (18PR97) is an apparent multicomponent site in the Patuxent River Park in southern Prince George's County, Maryland. The site is situated on the edge of a terrace behind a lower terrace along the Patuxent River. Soils at the site are of the Collington-Wist complex.

Little is known about 18PR97, despite a significant amount of avocational attention, occasionally involving personnel from MHT. The site has been known to local collectors for years and the extent of their activity is, for the most part, not known. However, in 1970, at least two members of the Archeological Society of Maryland (ASM) conducted a surface collection at the site, followed by the excavation of an unknown number of test units in the northern section of the site. It is not known whether MHT assisted in the excavations or provided funding. No report of their findings has ever been produced, however, MHT staff were later taken to the site and shown the general area of excavation by the ASM. In 1973, a more southerly portion of the site was surface collected and shovel test-pitted by local collector Dennis Webb. Again, no site report relating to these excavations was ever produced.

The only real data on 18PR97 is a report of the extant collection of a Mr. Robert Ogle provided to MHT during the course of survey work for an MHT published volume on the archeology of the Patuxent drainage. In 1980 the collection that Mr. Ogle had obtained from 18PR97 included 1 LeCroy point, 4 Piscataways, 1 Vernon, 2 Orient Fishtail points, 5 Selby Bay points (1 lanceolate, 2 stemmed and 2 side-notched), 2 Madison triangular points, and 1 Rappahannock fabric impressed sherd.

Based on this data, the site would appear to contain multiple components, but the extent to which these components are preserved is not known due to the poor reporting of the site. It would seem that a site visit is warranted to determine the current status of the site. It could be a significant resource, but additional work is needed to make an accurate determination.
