Site Number: 18WA474

Site Name: Lock 33 Complex

Prehistoric

Other name(s)

Historic

Unknown

Brief Description:

19th century canal lock bypass flume culvert

Site Location and Environmental Data:

Maryland Archaeological Research Unit No. 18

SCS soil & sediment code

Latitude 39.3255

Longitude -77.7186

Physiographic province Blue Ridge

Terrestrial site

Underwater site

Elevation 104 m

Site slope

Ethnobotany profile available

Maritime site

Site setting

-Site Setting restricted

-Lat/Long accurate to within 1 sq. mile, user may need to make slight adjustments in mapping to account for sites near state/county lines or streams

Topography

- Floodplain
- Hilltop/bluff
- Interior flat
- Upland flat
- Ridgetop
- Terrace
- Low terrace
- High terrace
- Rockshelter/cave
- Hillslope
- Unknown
- Other

Ownership

- Private
- Federal
- State of MD
- Regional/county/city
- Unknown

External Samples/Data:

Collection curated at NPS? - C & O Canal Park

Additional raw data may be available online

Summary Description:

Test excavations were undertaken to assess the impacts of a proposed stabilization project for the Lock 33 complex of the Chesapeake and Ohio Canal. This work was part of the National Parks Service C & O Canal Restoration Project. The major goal of the project was to determine if any significant cultural (historic) resources were present in the area of potential disturbance, particularly any remains of buildings present in historic photographs of the complex.

Excavation was carried out in two adjacent 1.524 meter (5 foot) square test units. The units were placed in a filled-in area above the historic by-pass flume of the canal. The size of the test units was chosen so as to better enable the recognition of structural features such as foundations or postmolds, however, no features of any kind were encountered.

The report does not provide a detailed breakdown of the materials recovered during excavation. Therefore, the counts above are minimal and very rough estimates. A total of 2,037 artifacts were recovered, nearly half of which were bottle glass fragments. Other artifacts recovered include 234 cut nails, plate window glass, crimped bottle caps, plastic record fragments, several .22 cartridge casings, a few animal bones and ceramic sherds (porcelain, whiteware or redware), an 1887 Indianhead penny, a belt buckle (patented 1859), and a Minnie ball.

No cultural material was recovered from the test excavations that could be reliably associated with 2 historic structures, no longer extant, which had serially occupied the area of Lock 33. Such material was probably washed away by one or more of the floods which have swept the area. Given the placement of the test units, it also seems unlikely that anything of further archeological value might be found within the immediate area.
