

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

2000 Ebright, C.A.

Supplementary Archeological Investigations for Maryland Route 2 Improvements: Access Road Options X and R, Storm Water Management Facilities, and Reforestation Areas, Anne Arundel County, Maryland.

Submitted to the Maryland State Highway Administration

Library ID No: 00007667 Catalog/Shelving ID: AN 355

Research Firm/Institution:

Maryland State Highway Administration,
Archeology Group
707 N. Calvert Street
Baltimore, MD 21203-0717

Sites examined:

18AN457 18AN1129
NRHP Eligible:

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification: This report describes the results of supplemental archeological investigations conducted prior to the federally-funded widening and improvement of MD Route 2 (Solomons Island Road). The Phase I survey reported in this volume was undertaken for two new access road alignments, Options R and X, designed to both avoid the core area of a known mid-19th century site, and meet local community concerns about potential future development of the property on which the site is located. Another alignment, Option XX, which passed directly through the 19th century site, had been dropped from consideration. Phase I survey was also completed for storm water management (SWM) pond locations on both sides of MD 2. Three configurations of SWM ponds totaling approximately 14 acres were tested, in addition to the roughly 2.5 acre area examined for access roads. Two reforestation areas to the south of the MD 2 project area totaling 4.1 acres were also examined. All work was carried out in compliance with Section 106 of the National Historic Preservation act and similar state laws requiring the consideration of cultural resources when carrying out publically-funded undertakings.
Phase II		
Phase III		

Project Objectives: -Identify archeological resources in the project areas. -Evaluate identified resources for their potential significance under the NRHP criteria for significance.

MAC Accession: 2001.031

Research Potential:

See below for remaining research questions at 18AN457.

615 Fairglen Lane
Annapolis, MD 21401

Sites examined:

18AN457

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification: This report describes a combined Phase I/II project carried out in March of 2003 at the previously identified Hardesty Farms Site (18AN457) in Anne Arundel County. The work was carried out prior to the (then) planned construction of a new housing development on the former Hardesty Farm property. The investigation was undertaken in compliance with Article 26, Title 3-109 of the Anne Arundel County Subdivision Regulations as requested by the Anne
Phase II	<input checked="" type="checkbox"/>	
Phase III		

Project Objectives: -Document the presence, absence, extent, and integrity of archeological resources within the planned subdivision. -Assess the potential significance of identified resources. -Make appropriate management recommendation for identified resources.

Research Potential:

The presence and extent of the Hardesty Farm Site (18AN457) was confirmed during the 2003 investigation, however, based on the widespread and low density of the artifact scatter and the failure to identify artifacts or features in undisturbed context, no further archeological investigations were recommended in the 2003 study area. It should be noted that no formal determination of eligibility has been made regarding 18AN457 as a whole.
