

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

2007 Roth, J. and M. Williams
Archeological Evaluation of 18AN1271 within the Proposed Odenton Town Center, Anne Arundel County, Maryland.
Submitted to The Halle Development, Inc.

Research Firm/Institution:

R. Christopher Goodwin & Associates, Inc.

Project Details:

	Project Justification:	Project Objectives:
Phase I		
Phase II <input checked="" type="checkbox"/>	This report presents the results of a 2005 Phase II evaluatory testing for the 10.28 acre historic period Site 18AN1271, located within the (then) proposed Odenton Town Center development in Anne Arundel County. Development of the property would require approval of a US Army Corps of Engineers permit triggering compliance with a number of pieces of legislation. The 2005 Phase II investigations were undertaken in compliance with applicable federal, state, and local regulations, including Section 106 of the National Historic Preservation Act of 1966, the Maryland Historical Trust Act of 1985, State Finance and Procurement Article 5A-325 and 5A-326 of the Annotated Code of Maryland, and Title 2-109 of the Anne Arundel County Subdivision regulations.	-Determine the nature, age, and function of the deposits at 18AN1271. -Establish the horizontal and vertical boundaries of the site. -Assess the integrity and significance of the site. -Determine if the site is locally or regionally significant applying the NRHP Criteria for Evaluation.
Phase III		

Research Potential:

Examination of the signatures of the charcoal kilns failed to identify substantial or significant resources related to either to the production of charcoal or to historic domestic or industrial activity at 18AN1271. Aside from 15 charcoal hearths, no additional landscape or structural features, cultural materials or deposits were present in the tested area. The isolated kiln features do not exhibit those qualities of significance as defined by the NRHP Criteria for Evaluation. It was determined that the Odenton Town Center development project would have no effect on significant archeological or historic properties and no additional investigations were recommended.
