

# Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

## REPORT INFORMATION:

1997 Friedman, J.L., J.E. Myers, and H. Crowl  
Patuxent Pointe Housing Development, Phase I Archeological Survey, Anne Arundel County, Maryland.  
Submitted to Winchester Homes, Inc.

Library ID No: 00005329 Catalog/Shelving ID: AN 337

## Research Firm/Institution:

Dames & Moore, Inc.  
7101 Wisconsin Ave., Suite 700  
Bethesda, MD 20814

## Sites examined:

18AN1066

NRHP Eligible:  N

[Justification](#)

## Project Details:

Phase I	<input checked="" type="checkbox"/>	<b>Project Justification:</b> This report describes the findings of a Phase I survey on a 177 acre development property near Crofton in Anne Arundel County, Maryland. The development, called Patuxent Pointe, was formerly farmed and consisted of utility structures, roads, and plowed fields. Under Article 26, Title 3-109 of the Anne Arundel County Subdivision Regulations, developers can be required by the county archeologist to conduct a cultural resource investigation to determine if their proposed project will affect prehistoric or historic archeological sites. The county archeologist, in this case, determined that some portions of the project area had a high probability for archeological resources.
Phase II	<input type="checkbox"/>	
Phase III	<input type="checkbox"/>	

<b>Project Objectives:</b> -Identify any archeological sites present in the survey area. -Identify areas of disturbance and areas that retain integrity. -Preliminarily evaluate the significance of any identified sites.
---

## Research Potential:

See below for remaining research questions at 18AN1066.

## Project Details:

Phase I	<input type="checkbox"/>	<b>Project Justification:</b> This report describes the findings of Phase II testing at 18AN1066. The site is situated on a 177 acre development property near Crofton in Anne Arundel County, Maryland. The development, called Patuxent Pointe, was formerly farmed and consisted of utility structures, roads, and plowed fields. Under Article 26, Title 3-109 of the Anne Arundel County Subdivision Regulations, developers can be required by the county archeologist to conduct a cultural resource investigation to determine if their proposed project will affect prehistoric or historic archeological sites. Site 18AN1066 was identified during Phase I survey in June of 1997 and recommended for further investigation (Phase II work).
Phase II	<input checked="" type="checkbox"/>	
Phase III	<input type="checkbox"/>	

<b>Project Objectives:</b> -Identify the boundaries of the site and its depth and artifact content. -Determine whether the remains of a structure can be identified and mapped. -Attempt to date the site more precisely.
--

## Research Potential:

Based on the evidence recovered from the Phase II investigation, Site 18AN1066 does not appear to have any significant research potential. Both the historic and prehistoric components lack stratigraphic integrity. In other words, only artifacts (versus features) are present and they lie within disturbed, plowzone contexts. Additionally, the information recovered from this multi-component site is relatively common knowledge and thus, of average importance. It would not be expected that further excavation would add important information to area history or prehistory. Therefore, no further archeological investigation is recommended.
