

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1970 Wright, H.
Field Notes on Maryland Archeology.

Library ID No: 95000498 Catalog/Shelving ID: MD 39

Research Firm/Institution:

Division of Archeology, MD Geological Survey
Johns Hopkins University
Baltimore, Maryland 21218

Sites examined:

18AN113 Others

Project Details:

Phase I	Project Justification:
Phase II <input checked="" type="checkbox"/>	The report is a collection of H. Wright's field notes and interpretations concerning his own excavation activity in Maryland, as well as his knowledge of Maryland archeology.
Phase III	

Project Objectives:
-Provide contextual information relating to collections which H. Wright excavated himself and other Maryland collections observed by the same.

MAC Accession: 1969.023

Research Potential:

See below for remaining research questions at 18AN113.

REPORT INFORMATION:

1976 Peck, D.W.
The Obrecht Site (18AN113).
Submitted to the Maryland Geological Survey
Library ID No: 00000483 Catalog/Shelving ID: AN 23A

Research Firm/Institution:

Donald W. Peck, University of Maryland
1111 Woods Hall
College Park, MD 20742

Sites examined:

18AN113

Project Details:

Phase I	Project Justification:
Phase II	This report describes the findings of a 1974 field project conducted at 18AN113, a previously identified prehistoric site. The (then) proposed construction of a waterfront community named Point Field Landing on the peninsula where the site is located prompted a salvage excavation project. The peninsula had already been subdivided into lots and a recreation area along with a pier had been constructed. Residential and infrastructure construction would severely impact or destroy the site. The site was, thus, excavated in the summer of 1974 by University of Maryland students under the directorship of the Maryland State Archeologist in order to obtain a representative sample before construction proceeded.
Phase III <input checked="" type="checkbox"/>	

Project Objectives:
-Excavated a representative sample of the materials present at 18AN113.
-Locate and identify a sample of the archeological features present within the area that will be impacted by house construction.

MAC Accession: 1974.024.001

Research Potential:

The evidence suggests that the site served as a base camp during the early periods of occupation, becoming a more permanent village by the Middle Woodland. Shortly after completion of 1974 excavations at Obrecht, the housing development was built and most, if not all of the remaining intact site would have been destroyed.
