

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1991 L.D. Myers
Final Report: A "Phase I" - Intensive Archaeological Survey of the Woodside Ridge
Subdivision, Glen Burnie, Anne Arundel County, Maryland.
Submitted to Cattail Associates, Inc.

Research Firm/Institution:

Epochs Past
339 Fairhaven Road
Dunkirk, MD 20754

Library ID No: 00000660 Catalog/Shelving ID: AN 170

Sites examined:

18AN486

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification: This report describes the findings of a Phase I survey of the Woodside Ridge Subdivision near Glen Burnie in Anne Arundel County. The work was carried out in accordance with the county Planning and Zoning subdivision regulation Article 26, Title 3-109, which requires consideration for archeological resources during the subdivision review process.
Phase II	<input type="checkbox"/>	
Phase III	<input type="checkbox"/>	

Project Objectives: -Locate, identify, and assess all historic and prehistoric cultural resources contained within the subdivision area.
--

Research Potential:

See below for remaining research questions at 18AN486.

REPORT INFORMATION:

1992 Polglase, C.R., et. al.
Phase II/III Archeological Investigations at the Garman Site (18AN486), Woodside Ridge
Subdivision, Anne Arundel County, Maryland.
Submitted to Cattail Associates, Inc. and the Anne Arundel County Trust for Preservation,
Inc.

Research Firm/Institution:

R. Christopher Goodwin & Associates, Inc.
337 East Third Street
Frederick, MD 21701

Library ID No: 00000713 Catalog/Shelving ID: AN 225

Sites examined:

18AN486

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification: This report presents the results of Phase II and Phase III archeological investigations at the Garman site (18AN486) within the Woodside Ridge subdivision near Glen Burnie in Anne Arundel County. This study was undertaken in accordance with Article 26, Title 3-109 of the Anne Arundel County Subdivision Regulations. Planned development at Woodside Ridge included the construction of single-family units, a road and parking network, and utility easements. Previously identified site 18AN486 would be significantly impacted by the planned undertaking and was already being adversely impacted by the activities of looters and relic hunters who had damaged the site.
Phase II	<input checked="" type="checkbox"/>	
Phase III	<input type="checkbox"/>	

Project Objectives: -Determine the research potential of the Garman site and, if significant, identify specific components of the site worthy of archeological mitigation. -Mitigate selected portions of the site deemed significant by the County Archeologist. -Forestall the looting damage to the site and salvage data from the looted areas.

Research Potential:

The archeological investigations of the Garman site (18AN486) have made major contributions to the understanding of the prehistoric occupation of Anne Arundel County. Most importantly, it is one of only a few sites that provides documentation of the early Holocene period in Maryland. After completion of the Phase II/III project, the residential subdivision received approvals and proceeded with construction. The site was most likely significantly impacted by the construction work that followed.
