Annapolis, MD 21401

## Sites examined:

18AN1405

## Project Details:

Phase I

### Project Justification:

Phase II

This report describes a combined Phase I/II project carried out in 2008 at the 15.1 acre Zebron Property in Severn, Anne Arundel County. Plans had been submitted to the county to subdivide the property for residential development. The archeological work was carried out in compliance with Article 17, Title 6-502 of the Anne Arundel County Subdivision Regulations as requested by the Anne Arundel County Department of Planning and Zoning. This legislation requires consideration for archeological resources during the course of the subdivision review process.

Phase III

### Project Objectives:

-Document the presence, absence, and extent of archeological resources on the Zebron Property.

-Provide an assessment of the potential significance of any identified resources.

-Make Recommendations for the management of identified resources.

## Research Potential:

The Zebron Site (18AN1405) was identified as encompassing most of the ridge upon which the Disney Road Cross-Wing Farmhouse (MIHP# AA-1068) stands. This multi-component archeological site exhibited both a confined prehistoric component as well as components associated with the 19th and 20th century occupation of the property. The Phase II evaluation in 2008 revealed that the site was confined to the plowzone and retained little integrity. No further archeological investigation of the site is warranted.
