

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

2002 Palus, M.M. and E.B. Kryder-Reid
 Report on Archaeological Investigations Conducted at the St. Mary's Site (18AP45), 107
 Duke of Gloucester Street, Annapolis, Maryland, 1987-1990.
 Submitted to Charles Carroll House of Annapolis, Inc.

Research Firm/Institution:

Archaeology in Annapolis
 1111 Woods Hall
 College Park, MD 20742-7415

Library ID No: 97000837 Catalog/Shelving ID: AP 89

Sites examined:

18AP45

Project Details:

Phase I		<p>Project Justification: This report describes a series of investigations at the Charles Carroll House in Annapolis from 1987-1990. In 1986, Archaeology in Annapolis was invited by the Charles Carroll of Carrollton 250th Anniversary Committee to participate in the anniversary celebration of the birth of Charles Carroll of Carrollton (1737-1832). With this invitation Archaeology in Annapolis (AIA) planned for four years of archeological field survey that would include research and interpretation to the public on the importance of the rich archeological remains at 18AP45. AIA is (in part) publically funded through the University of Maryland and periodic grants received from the City of Annapolis. Through an agreement with the Redemptorists, excavation began in June of 1987, as part of the University of Maryland field school.</p>
Phase II	<input checked="" type="checkbox"/>	
Phase III	<input checked="" type="checkbox"/>	

<p>Project Objectives: -Conduct remote sensing at the site to identify potential features and artifact deposits for further inquiry. -Gain information on the construction, dating, and occupation of the Carroll frame house torn down in the mid 19th century by the Redemptorists. -Gain an understanding of the articulation of the house and its porch to the adjacent garden. -Further an understanding of the development of the site throughout its 300 year history. -Explore the possible location of Proctor's Tavern. -Investigate the construction of the 1770s garden. -Trace the transformation of the local landscape through time.</p>

Research Potential:

See below for remaining research questions at 18AP45.

REPORT INFORMATION:

1992 Logan, G.C., et. al.
 1991 Archaeological Excavations at the Charles Carroll House in Annapolis, Maryland, 18AP45.
 Submitted to Charles Carroll House of Annapolis, Inc.

Sites examined:

18AP45

Project Details:

Phase I		<p>Project Justification: This report provides a detailed summary of archaeological excavations that were conducted by Archaeology in Annapolis (AIA) inside the ground story of the Charles Carroll House in Annapolis (18AP45) during the summer and fall of 1991. AIA is (in part) publically funded through the University of Maryland and periodic grants received from the City of Annapolis. This project was initiated by Charles Carroll House of Annapolis, Inc. (CCHA), and was made possible through an agreement between CCHA and Historic Annapolis Foundation. It was designed as an initial phase of a larger project to restore the Carroll House to its late 18th century appearance, while at the same time adding modern facilities to accommodate receptions, conferences, and other adaptive uses. These excavations were conducted between June</p>
Phase II		
Phase III	<input checked="" type="checkbox"/>	

<p>Project Objectives: -Conduct excavation in each of the 11 identified areas of the ground storey. -Gain an understanding of the house's many architectural changes spanning the late 17th through late 20th centuries.</p>
--

and mid October of 1991, prior to interior house restoration, with monitoring of site restoration activities continuing well into 1992.

Research Potential:

The Carroll House was once the show piece property of its most famous occupant, Charles Carroll of Carrollton. With that history and with its current landscape, the property (18AP45) appears to be an unchanged shell reflecting its 18th century character, but it is actually much more. The architectural and archeological data recovered from 1987-1991 provide researchers with a wealth of information about the lifestyle of diverse peoples from the 18th through the 20th centuries and sensitive analysis of these materials will continue to produce new insights into their everyday lives. The site retains good integrity and significant portions of it (mostly outside of the house) remain preserved at the site for future research. Site 18AP45 should continue to be considered a significant archeological resource.
