

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

2001 Ward, J.A. and J.P. McCarthy

A Phase I/II Cultural Resources Investigation of the Proposed Moore's Orchard Development, Baltimore County, Maryland.

Submitted to Ryland Homes

NRHP Eligible:

[Justification](#)

Project Details:

Phase I

Project Justification:

Phase II

This report describes a combined Phase I/II project carried out in 2000 prior to development of the former Moore's Orchard property into a new residential subdivision. The new development would include new homes streets, and associated infrastructure. A Section 404 wetlands permit was required for the project to move forward, and archeological survey of the property (in accordance with Section 106 of the NHPA) was recommended by MHT.

Phase III

Project Objectives:

-Locate unidentified archeological resources on the Moore's Orchard property.

-Relocate previously identified site 18BA418 and conduct a combined Phase I/II effort there.

-Develop appropriate recommendations for the management of any identified resources.

Research Potential:

Based on the results of the combined Phase I/II effort at 18BA418 in 2000 and 2001, it does not appear to possess the ability to provide further information concerning life in the past and was not recommended as eligible for listing in the NRHP. MHT concurred with this opinion based on the low density of cultural material and lack of research potential.
