

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1992 Kuranda, K.M., et. al.
Archeological and Architectural Investigations at Camden Yards, Baltimore, Maryland.
Submitted to the Maryland Stadium Authority

Library ID No: 00005647 Catalog/Shelving ID: BC 74

Research Firm/Institution:

R. Christopher Goodwin & Associates, Inc.
337 East Third Street
Frederick, MD 21701

Sites examined:

18BC88 18BC89 Others

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II		This study presents the results of archival, archeological, and architectural investigations at Baltimore's Camden Yards. The 85 acre project area incorporated a 71-block portion of the former Camden Yards Industrial Park, the site of Oriole Park at Camden Yards, and of a planned professional football stadium for the Baltimore Ravens. The project was conducted in compliance with Maryland Historic Preservation Legislation, Article 83B, Sections 617-618.
Phase III		

MAC Accession: 1993.002

Project Objectives:
-Assess the integrity of the archeological record.
-Facilitate selection of specific properties and resources for further investigation.

Research Potential:

See below for remaining research questions at 18BC88.

See below for remaining research questions at 18BC89.

REPORT INFORMATION:

1998 Sanders, S.L. and M.R. Williams
Archeological Mitigation of the J.S. Berry Brick Mill (18BC89) and Pawley Stoneware Kiln (18BC88), at the Proposed Ravens' Stadium, Baltimore, Maryland.
Submitted to the Maryland Stadium Authority

Library ID No: 00005693 Catalog/Shelving ID: BC 113

Research Firm/Institution:

R. Christopher Goodwin & Associates, Inc.
241 East Fourth Street, Suite 100
Frederick, MD 21701

Sites examined:

18BC88 18BC89

Project Details:

Phase I		Project Justification:
Phase II		This report presents the results of Phase III archeological mitigation at the site of the Baltimore Ravens' Football Stadium, Baltimore, Maryland. These investigations were requested by the Maryland Stadium Authority in compliance with Maryland Historic Preservation Legislation, Article 83B, Sections 617-618. Site development plans comprised the construction of a football stadium and associated parking areas.
Phase III	<input checked="" type="checkbox"/>	

MAC Accession: 1998.004.001

Project Objectives:
-Document the presence and integrity of any additional features associated with the mill of the kiln.
-Document both sites and gather data necessary for interpretation of deposits and features.
-Make management recommendations concerning these resources.

Research Potential:

Site 18BC88 was clearly a significant archeological resource. The data recovery in 1996 and the preceding work adequately documented the site and resulted in the collection of a representative sample of material culture from the site. The construction of the Baltimore Ravens stadium resulted in the destruction of any remaining components of the site. Thus, the only avenue for additional research on the site will be re-examination of the existing collection.

Site 18BC89 was clearly a significant archeological resource. The data recovery in 1996 and the preceding work adequately documented the site. The construction of the Baltimore Ravens stadium resulted in the destruction of any remaining components of the site, thus, it no longer has any research potential.
