

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

2003 Child, K. et. al.
Phase I Archeological Survey of Approximately 95 Acres, Phase II Archeological Evaluation of Site 18CA218, and Architectural Evaluation of Dreamland (The Hayman Farm Complex) at the Proposed Ridgely Business Park, Caroline County, Maryland.
Submitted to Whitman, Requart, and Associates, LLP

Library ID No: 97001834 Catalog/Shelving ID: CA 14

Sites examined:

18CA218

NRHP Eligible: N

[Justification](#)

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II	<input checked="" type="checkbox"/>	In 2003, archeological survey and architectural reconnaissance were conducted at Site G-01 (18CA218) ahead of construction of the proposed Ridgely Business Park. Nine historic period archeological sites, including 18CA218, were identified during the Phase I investigations. Only site 18CA218 was recommended for Phase II evaluation.
Phase III		

MAC Accession: 2004.022

Project Objectives:
-Identify all archeological resources located within the Area of Potential Effects (APE)
-Make preliminary assessment of the impacts of the proposed project on those resources
-Determine the age, nature and function of the site
-Determine the horizontal and vertical boundaries of the site
-Assess the integrity of the site
-Document the integrity of the historic structures within the Hayman Farm complex
-Place the structures within the regional context of Caroline County

Research Potential:

Site G-01 (18CA218) is defined by broad scatter of historic artifacts dated from the mid-19th to the early 20th centuries, mostly related to the former Hayman Farm complex. The location of a freestanding chimney and a brick foundation wall within the site boundaries generally correspond to the location of a structure depicted on an 1875 map and indicated that historic use of the area could predate the 20th century farm complex. Although portions of the site appear to retain some integrity, cultural deposits and archeological features identified in those portions failed to exhibit sufficient research potential to substantially add to our understanding of the historic settlement and development of Caroline County. No further archeological investigations were recommended at the site.
