Phase II <input checked="" type="checkbox"/>	The site was excavated for pure research by members of the Sussex Society of Archeology and History.	-Locate features and artifacts in order to determine site type and date.
Phase III		

## Research Potential:

The Willin Site (18DO1) is an important site for understanding prehistoric economy and subsistence strategies. The artifact assemblage suggests at least three periods of occupation during the Late Woodland period. The presence of storage/ refuse pits and dense occupational debris suggest settled occupation and provides a basis for further research at the site.
