

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1975 Geasey, S.O.
Archeological Survey for the Proposed McCain Loop Transmission Line.
Submitted to the Allegheny Power Service Corporation
Library ID No: 00005947 Catalog/Shelving ID: FR 3

Research Firm/Institution:

Spencer O. Geasey
Frederick, MD

Sites examined:

18FR143 18FR144

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II		A Phase I archeological survey was conducted in preparation for construction of the proposed McCain Loop of the Allegheny Power Service Corporation's electrical transmission line in Frederick County, Maryland.
Phase III		

Project Objectives:
-Identify any archeological sites within the proposed project corridor.

MAC Accession: Geasey Collection (possible)

Research Potential:

Site 18FR143 is probably a small temporary campsite that was used occasionally by prehistoric hunting parties. The limited amount of chipping debris recovered indicates that very few artifacts were made at the site. No synopsis report for the site was prepared.

See below for remaining research questions at 18FR144.

REPORT INFORMATION:

1977 Mid-Atlantic Archaeological Research, Inc.
Archeological Investigations at the McCain Loop Transmission Line Site (18FR144).
Submitted to the Allegheny Power Service Corporation
Library ID No: 00006043 Catalog/Shelving ID: FR 84

Research Firm/Institution:

MAAR Associates, Inc.
P.O. Box 655
Newark, DE 19715

Sites examined:

18FR144

Project Details:

Phase I		Project Justification:
Phase II	<input checked="" type="checkbox"/>	During Phase I reconnaissance survey, prehistoric site 18FR144 was discovered and found to be located near one of the proposed power line support towers. Thus, Phase II test excavations were carried out in the footprint area of the proposed tower.
Phase III		

Project Objectives:
-Identify and delineate archeological resources within the site and, to the extent possible, their horizontal and vertical limits.
-Evaluate the significance of those identified resources.

MAC Accession: 1977.057

Research Potential:

See below for remaining research questions at 18FR144.

REPORT INFORMATION:

1979 Peck, D.W.
Archeological Resources Assessment of the Monocacy River Region, Frederick and Carroll Counties, Maryland: Phases I and II.
Submitted to the Maryland Historical Trust, Frederick & Carroll Co. Planning Commissions
Library ID No: 00005981 Catalog/Shelving ID: FR 28B

Research Firm/Institution:

Maryland Historical Trust
Shaw House, 21 State Circle
Annapolis, MD 21401

Sites examined:

18FR144

Others

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II	<input checked="" type="checkbox"/>	This work was conducted in order to develop a typology of ceramics and projectile points for the Monocacy region. The typology was devised from examination of the major archeological collections from the study area, coupled with Phase I survey (mostly surface collection) and some Phase II testing.
Phase III		

Project Objectives:
-Obtain access to enough representative pottery and point types throughout the region, to create a broad typology and chronology of the Monocacy.

MAC Accession: 1980.019

Research Potential:

Multiple projects have failed to turn up significant archeological deposits at 18FR144. The site appears to be a lithic scatter of probable Late Archaic age and has little to no significant research potential.

* This cover sheet section replicates some data provided on other cover sheets. Peck's extensive survey provides details for numerous archeological sites and CRM projects.
