

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1980 Peck, D.W.
Test Excavations at the Nolands Ferry Site, Frederick County, Maryland. Maryland
Archeology 16(1):2-18.

Research Firm/Institution:

The Archeological Society of Maryland, Inc.
P.O. Box 1331
Huntingtown, MD 20639

Library ID No: MDARC16-1

Sites examined:

18FR17

NRHP Listed:

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II	<input checked="" type="checkbox"/>	This brief report provides some of the findings of the work at the Nolands Ferry site performed by Peck and ASM in 1978 as part of Peck's Monocacy Valley Survey.
Phase III		

Project Objectives:
-More clearly define the types of limestone-tempered pottery utilized at the site and in the Monocacy region.
-Collect charred-wood radiocarbon samples in association with the limestone-tempered pottery for dating.
-Study the site structure of the Late Woodland occupation.
-Evaluate the eligibility of the Nolands Ferry site for nomination to the National Register of Historic Places.

MAC Accession: 1978.017

Research Potential:

See above for remaining research questions at 18FR17.

REPORT INFORMATION:

1982 Kavanagh, M.
Archeological Resources of the Monocacy River Region.
Submitted to the Maryland Historical Trust, Frederick & Carroll Co. Planning Commissions

Research Firm/Institution:

Maryland Historical Trust
Shaw House, 21 State Circle
Annapolis, MD 21401

Library ID No: 00005983 Catalog/Shelving ID: FR 28D

Sites examined:

18FR372 Others

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:
Phase II	<input checked="" type="checkbox"/>	An intensive regional survey was undertaken within the Monocacy River Valley in an effort to generate an expanded base of site data, develop a predictive model for site location and function, and reveal a summary of the cultural chronology of human occupation in the valley.
Phase III		

Project Objectives:
-Interview local collectors and informants and field check all reported sites.
-Survey selected sampling units in an effort to locate additional sites in a systematic way.
-Perform archeological testing at several select sites.

MAC Accession: 1980.019

Research Potential:

See below for remaining research questions at site 18FR372.

REPORT INFORMATION:

1999 Fehr, A.L. and K. Grandine
Phase I Archeological Reconnaissance of the Tuscarora Creek Sewer Interceptor, Frederick County, Maryland.
Submitted to the Frederick County Department of Public Works

Research Firm/Institution:

R. Christopher Goodwin & Associates, Inc.
241 E. Fourth Street, Suite 100
Frederick, MD 21701

Library ID No: 00007570 Catalog/Shelving ID: FR 140

Sites examined:

18FR372

18FR410

Project Details:

Phase I	<input checked="" type="checkbox"/>	Project Justification:	Project Objectives:
Phase II		This project was undertaken in anticipation of the construction of a sewerline interceptor.	-Identify and provide preliminary assessment of archeological resources located within the project corridor through archival background research and archeological field investigations.
Phase III			

MAC Accession: 2002.013 (possible)

Research Potential:

As one of the few glass works in operation in the 18th century in Frederick County, site 18FR372 is a source of information on the economic development and settlement of the Monocacy Valley. It was part of a complex which included a saw mill, a tan yard, and a grist mill, and it is possible that other parts of this small settlement of the late 1700's may have significant archeological remains.
