

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1992 Slattery, R.G. and D.R. Woodward
The Montgomery Focus: A Late Woodland Potomac River Culture.

Library ID No: 00001414 Catalog/Shelving ID: E99.W84S57

Sites examined:

18MO9

Project Details:

Phase I	
Phase II	<input checked="" type="checkbox"/>
Phase III	<input checked="" type="checkbox"/>

Project Justification:
Final report on excavations at 18MO9, the Winslow Site, from the 1940-1941 and 1959-1961 field seasons.

Project Objectives: The goals of the research were to gather information on the Montgomery complex and the Late Woodland period and to stop the unsystematic excavating of the site by amateur hobbyists.
--

Research Potential:

The Winslow Site (18MO9) contributes immensely to our understanding of the Late Woodland period in Maryland. It provides a base for invaluable research on the Montgomery complex of the Middle Potomac Valley. Particularly, the identification of structures, probably dwellings, adds to the understanding of inter-site organizational patterns. Currently a portion of the site is situated on no-till land and sits partly within the boundaries of the National Park Service. It was the express intent of the researcher in 2002-2003 that part of the site was preserved for future research by other archeologists. That work, if performed, has the potential to contribute even more to our understanding of site organization and settlement patterns during the Late Woodland period.

REPORT INFORMATION:

2007 Dent, R.J.
Final Report on the 2002 and 2003 Excavations at the Winslow Site (18 MO 09),
Montgomery County, Maryland.

Library ID No: 97002994 Catalog/Shelving ID: MO 229

Sites examined:

18MO9

Project Details:

Phase I	
Phase II	
Phase III	<input checked="" type="checkbox"/>

Project Justification:
Justification for the research includes gathering more information about the site and to incorporate this additional data with that first gained during the early research. The 2002 and 2003 seasons were a field school and was an important teaching tool for students.

Project Objectives: -Locate a domestic structure and associated feature. -Determine if the site was palisaded. -Recover charcoal samples for AMS dating. -Collect data that would provide information on subsistence practices. -Preserve some of the site for future research and cause minimal disturbance to any located human burials.

Research Potential:

The Winslow Site (18MO9) contributes immensely to our understanding of the Late Woodland period in Maryland. It provides a base for invaluable research on the Montgomery complex of the Middle Potomac Valley. Particularly, the identification of structures, probably dwellings, adds to the understanding of inter-site organizational patterns. Currently a portion of the site is situated on no-till land and sits partly within the boundaries of the National Park Service. It was the express intent of the researcher in 2002-2003 that part of the site was preserved for future research by other archeologists. That work, if performed, has the potential to contribute even more to our understanding of site organization and settlement patterns during the Late Woodland period.

REPORT INFORMATION:

2006 Moore, E.A.

Sites examined:

18MO9

Project Details:

Project Justification: This report contains the faunal analysis from features identified during the 2002 field season at the Winslow Site.
--

Project Objectives: -The main goal was to develop a more complete picture of subsistence at the Winslow Site.

Research Potential:

The Winslow Site (18MO9) contributes immensely to our understanding of the Late Woodland period in Maryland. It provides a base for invaluable research on the Montgomery complex of the Middle Potomac Valley. Particularly, the identification of structures, probably dwellings, adds to the understanding of inter-site organizational patterns.
