

Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

REPORT INFORMATION:

1989 Koski-Karell, D.
Phase 2 Archeological Intensive Survey and Site Evaluation Investigation for the Administrative Services Building Project at the University of Maryland-College Park, Prince George's County, Maryland.
Submitted to the Dept. of Engineering & Architectural Services, University of Maryland
Library ID No: 00006664 Catalog/Shelving ID: PR 102

Research Firm/Institution:

Karell Archeological Services
Post Office Box 342
Washington, DC 20044

Sites examined:

18PR383 18PR387

Project Details:

Phase	Project Justification:
Phase I	
Phase II <input checked="" type="checkbox"/>	This report details a Phase II intensive survey and testing project conducted in 1989 prior to the construction of a new administrative building on the campus. Two parking lots and a storm water retention pond would also impact any sites in the project area. The total terrain to be affected was about 6 acres.
Phase III	

Project Objectives:
-Intensively survey the project area for cultural materials.
-Evaluate any potentially significant archeological materials encountered.

Research Potential:

The evidence recovered from 18PR387 indicates the presence of a disturbed and highly diffuse lithic scatter associated with ephemeral prehistoric activity. These cultural materials are not of potential archeological significance. The site, today, would be even further impacted by the subsequent construction of the aforementioned administrative building and associated infrastructure.
