

# Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

Site File for the Graves Site (18TA234).

Library ID No: 18TA234 SF      Catalog/Shelving ID: Site Files

Sites examined:

18TA234

Project Details:

Phase I

Project Justification:

Phase II

Site Files contain some of the excavation material from the 1985 and 1986 investigations at the site and related correspondence.

Phase III

Research Potential:

The Graves site (18TA234) consisted of 2 or 3 human burials that eroded out of the riverbank as a result of natural shoreline erosion. They may indicate the presence of a small family cemetery at the site. No datable artifacts were recovered in association with the burials. However, the coffin construction did indicate a pre-20th date for the interments. The square nails may further suggest a date in the 19th century. If further burials were to be uncovered at the site, then based on prior cooperation, the landowners would likely notify MHT.
