

# Phase II and Phase III Project Cover Sheet

All information contained within the individual site database and inventory sheets is solely the work of the researchers and authors noted below. The data provided has been culled from the original site reports noted below and in many cases has been lifted directly from them with little or no editing. The database and inventory sheets are meant to serve as a synopsis of the report findings and a finding aid and are not intended to replace or republish the research of the authors noted below.

## REPORT INFORMATION:

1970 Bastian, T.  
Site File for The Reeves Site (18WC15).

Research Firm/Institution:

Maryland Geological Survey  
2300 St. Paul Street  
Baltimore, MD 21218

Library ID No: 18WC15 SF      Catalog/Shelving ID: Site Files

Sites examined:

18WC15

Project Details:

Phase I

Project Justification:

Phase II

The site was first exposed in 1969 during land clearance for a housing development. It was being severely damaged by erosion and there was a concern that it would be destroyed during construction of a bulkhead and the removal of several trees.

Phase III

Project Objectives:

-Clarify the site boundaries.

-Determine the character and function of the various chronological components at the site.

-Determine the potential affect of construction and erosion on the site.

-Conduct "Pure Research".

MAC Accession: 1990.002

Research Potential:

The Reeves Site (18WC15) is an important site for understand Late Archaic and Woodland period activities. This is one of the only clearly stratified prehistoric sites on the Eastern Shore and as such is a valuable resource. The large number of intact refuse pits, and the presence of 2 prehistoric dog burials, suggests that the occupation periods may have been longer-term, possibly as seasonal procurement camps. Unfortunately, the site has not been visited recently and its condition, as affected by construction and natural erosion processes, is unknown. A revisit to assess its current condition would not be unwarranted.
